

# Oluwatoyin Joseph Disu

## Software Engineer

I wrote my first line of code (Java) in my first year (2014) in college, but my interest in coding started in 2020 because I wanted to build my own games and software. I started learning how to code in November, 2020. I have hands on experience developing websites, full-stack web applications and APIs.

## EDUCATION

### Electrical and Electronics Engineering

Elizade University CGPA - 4.69

09/2014 - 08/2019

Ondo state Nigeria

#### Courses

- Computer Programming
- Artificial Neural Networks
- Computer Systems Engineering
- Object-Oriented Design and Programming
- Digital Signal Processing
- Robotics and Automation

## WORK EXPERIENCE

### Intern

#### Inspired Technologies

04/2018 - 10/2018

Abuja Nigeria

IT firm, software engineering, power and control systems engineering, networking

#### Achievements/Tasks

- built an smart automatic changeover system

### IT Support Intern

#### John Nice Technologies

07/2017 - 09/2017

Utako Abuja

Computer Hardware Engineering

#### Achievements/Tasks

- Fixing Computer hardware issues

### Backend Software Engineer Intern

#### HNG Internship

08/2021 - Present

Remote

Backend Software Engineer Intern at ZuriChat.

### Backend Developer

#### Axcord

10/2021 - 11/2021

Remote

Contract: Backend Developer

### Backend Developer

#### CustomerPayMe

11/2021 - Present

Remote

Contract: Building and Debugging APIs

## SKILLS

JavaScript

React

Node

Express

MongoDB

Redux

HTML

CSS

Bootstrap

PostgreSQL

## PERSONAL PROJECTS

### EventGo (08/2021 - Present)

- This is an event management web application, where users can create either paid or free for people to register. Event organisers also have a dashboard where organizers can view who registered for their event. I also integrated flutterwave payment gateway.
- Code: <https://github.com/sephson/EventGo>
- Live Link: <https://eventgo-app.herokuapp.com/>

### Bleet (07/2021 - 08/2021)

- This is a fullstack social media application with instant messaging. Some of its features includes creating a post, liking a post, deleting your post, sending direct msg, viewing and searching for users, following and unfollowing a user, editing your profile, commenting on posts
- Code: <https://github.com/sephson/Bleet-Project/>
- Live Link: <https://bleet.netlify.app/>

### Movies App (04/2021 - 04/2021)

- This is a movies search application. I worked with external api MovieDB to display movies on the web application. Users can search for movies, view trending movies and also look at the details of a movie
- Code: <https://github.com/sephson/React-Movies-Search-App>
- Live: <https://sephson.github.io/React-Movies-Search-App/>

### Weather App (03/2021 - 03/2021)

- This is a web application used to check my weather using an external api. Users can search for any location's weather and also get their current location's weather using web geolocation api
- Code: <https://github.com/sephson/weather-app>
- Live: <https://sephson.github.io/weather-app/>

### Manage (02/2021 - 02/2021)

- This is a landing page challenge from frontend mentors to hone my html and css skills.
- Code: <https://github.com/sephson/Manage-Landing-Page>
- Live: <https://sephson.github.io/Manage-Landing-Page/>

## CERTIFICATES

B. Engr Electrical and Electronics Engineering  
(09/2014 - 08/2019)
